THE MAP OF POLISH LANDS OF THE CROWN IN THE 16TH CENTURY – A SPATIAL DATABASE

The map of Polish lands of the Crown in the 16th century – a spatial database

The Tadeusz Manteuffel Institute of History of the Polish Academy of Sciences

State of work: finished (with possibilities of further development) **Update date: 13.12.2021**

The data presented here are the result of work on the series: *Historical Atlas of Poland. Detailed Maps of the 16th Century*, which was completed in 2021[1], and are made available in several forms. Firstly, through a Web-GIS application that allows viewing these data in the form of a digital map, on which – as far as technically possible – the symbolisation from the paper Atlas maps has been reproduced. Secondly, in the form of downloadable layers from the data repository
